To Whom It May Concern,

I have used the services of Gerry Beckett to assist in the investigation and clean-up of contaminated real property and groundwater.

I most recently used his services as an independent consultant to review the work of another environmental consultant. His insight in reviewing this report proved beneficial in getting the lead agency to reconsider its original determination of responsibility for the groundwater contamination.

In summary, I have found Mr. Beckett to be responsive to my needs as a client, as well as knowledgeable and competent with respect to environmental contamination issues. If you need further information, please feel free to contact me.

Very truly yours,

Li-An C. Leonard
