To Whom It May Concern:

I have worked with Gary Beckett on various enviromental and remediation projects for several years.

Mr. Beckett's excellent performance in the field, and the subsequent required analysis and reporting of data had a large degree of influence on the selection of his former employer as a primary environmental consultant.

If you have any questions, I may be reached at (818) 505-2464

Sincerely,

Roger Johnson
Area Supervisor
